

Advances in Geological Remote Sensing
GRSG Annual General Meeting 2011
Including the 2011 Oil and Gas industry workshop
7th – 9th December 2011, ESA ESRIN, Frascati, Italy

A must attend event for professionals, academics, students or anyone with an interest in geology and remote sensing. Registration is free but space is limited and filling up fast so visit the registration site and sign up before it's too late at: <http://earth.eo.esa.int/workshops/grsg2011/>

HIGHLIGHTS

Presentations and discussions led by the international authorities in their fields:

- **Application of Remote Sensing to Geological Mapping and Exploration**
- Using remote sensing to **solve current and future challenges facing the oil & gas industry**
- Leveraging Remote Sensing to **reduce impact and enhance efficiency in the Mining Sector**
- **Detecting, monitoring and mitigating natural and man-made hazards** what can remote sensing offer?
- **InSAR applications** for monitoring and mapping ground motion
- EU funded R&D initiatives using remote sensing including the **European Framework and GMES Programmes**
- Developments in **Thermal Remote Sensing**
- **New Sensors & Satellites** and their application to Geological Remote Sensing
- **Software and Applications.** Turning data into information , serving information over the WWW

Network with representatives from:

- the Oil & Gas sector
- The European Space Agency
- Remote Sensing consultancies and service providers
- Software developers
- Satellite operators
- Academia and Research
- Remote Sensing Interest Groups & Societies including the RSPSoc & GRSG

Enjoy Rome & Frascati:

- ESA hosted ice breaker at the Frascati Campus
- Reception dinner at the beautiful Villa Grazioli overlooking Rome
- Cheese and Wine tasting in Frascati

Hurry! Call for papers closes
30th September 2011
